IIGF Risk Management Process

IIGF ERM Framework

Risk Identification

Evaluation

Risk

Risk Treatment Risk Monitoring Risk Reporting

- Identify risk that may hinder IIGF in achieving its business objective
- Evaluate identified risk in terms of likelihood and impact to determine its risk level
- Determine treatment to identified risk with consideration to value-tobe-gained with riskfaced
- Monitor KRI and performance/ execution of risk treatment
- Report risk profile and monitoring result to BoD and relevant personnel
